

Father has been a little hot under the collar lately. Why?

There's no air conditioning in Father's residence, at St. Paul the Apostle Rectory.

St. Paul the Apostle Rectory has a heating and air conditioning system that is original, installed in 1969 when the rectory was erected. The heating function is decent, but the problem is with the air conditioning. To replace the entire system for the large building would be a considerable cost, at least a six-digit figure! We have settled on a step-by-step approach, fixing the areas that need to be addressed first. For us, this would be the pastor's residence, in those rooms of the rectory that are used most. The system upgrade for this area is for three split-duct units at a cost of \$11,900.

The proceeds from our next two drive-through chicken dinner events will help defray this cost, as well as a special second collection at St. Paul's Masses on the weekend of July 17-18.

Please consider a gift to help fund a working air conditioning system.

How you can help:

- ◆ Place cash or check into the special 2nd Collection at St. Paul's on the weekend of July 17-18.
- ◆ Donate online with your debit or credit card at spacny.org. Click on "Donate Online" then choose "Air Conditioning Repair Fund".
- ◆ Mail check to:
St. Paul the Apostle Church
Air Conditioner Fund
2777 Albany Street
Schenectady, NY 12304
- ◆ Eat more chicken! Giffy's Drive-Through Chicken Bar-B-Q Dinner at St. Paul's. Tuesday, July 27th—4 PM til sold out.

THANK YOU!
